ACKNOWLEDGEMENT

We would like to take this opportunity to mention a few names, without whom, our project would not be successful. To begin with, we would like to thank our Principal, Mr. V Rajasheakaran for his constant encouragement and words which strike us to do better.

Our Vice Principal Mr. A Palani Kumar for their observation & suggestions. A very vital support from our project Coordinator Mr.Shiju Gangadharan, who continuously helped us by providing us time, place & guidance to complete the project.

A moment to appreciate our project in-charges, who were remarkable with knowledge, patience and wisdom, Mrs.Vijayalaxmi Imandar, Mr. D M Umesh, Ms. Keerthi Basur for their endurance & advices would never let us go down. They provided us with continuous guidance & support.

We would like to thank all of our teaching & non-teaching staffs who have helped us throughout our Mechatronics System Design project within the given time period.

ABSTRACT

This project work modifies a treadmill to better fit the requirements of users as a LOPIFIT (Treadmill bicycle) is designed for those humans who love to run outside. Treadmill equipped on bicycle frame and formulates a big innovation named 'LOPIFIT'. This bicycle has electronic parts and runs perfectly on human momentum. As the rider walks on the treadmill, the belt butts up against the rear wheel propelling the bike forward. Lopifit6 is designed for runners as the ideal treadmill device, this device combines the best exercise running and cycling to deliver a low-impact, high-performance workout outdoors. We believe it is the ideal device for healthy runners. It delivers an exercise experience that is closer to running than anything else available today.
